Date: February 7, 2024

Hearing Time: 9:30 am

Re: SB 3234 relating to the stabilization of property insurance

I am Victor Brock, representing the Mortgage Bankers Association of Hawaii ("MBAH"). The MBAH is a voluntary organization of individuals involved in the real estate lending industry in Hawaii. Our membership consists of employees of banks, savings institutions, mortgage bankers, mortgage brokers, financial institutions, and companies whose business depends upon the ongoing health of the financial services industry of Hawaii. The members of the MBAH originate and service, or support the origination and servicing, of the vast majority of residential and commercial real estate mortgage loans in Hawaii. When, and if, the MBAH testifies on legislation or rules, it is related only to mortgage lending and servicing.

**The MBAH SUPPORTS THIS BILL**, which reinstates the Hawaii Hurricane Relief Fund ("HHRF"), which provides additional sources of financing the HHRF, and which expands the HHRF's scope to include condominium building insurance.

The availability of hurricane insurance, particularly for condominium projects, has become increasingly limited, with certain insurers refusing to renew coverage at existing levels to insure the full estimated replacement cost of rebuilding the improvements in the event of a named storm. Fannie Mae and Freddie Mac, to whom we sell mortgages, both require hurricane insurance for the full replacement value. Even if a lender contemplates keeping a loan secured by a unit in one of the underinsured condo projects in their portfolio (as they are unable to sell the loan to Fannie Mae or Freddie Mac), prudential regulators are likely to cite safety and soundness concerns of holding a loan on our balance sheet secured by underinsured collateral. As a result, we are unable to finance units in certain condominium projects, thereby decreasing options for first-time

homebuyers and low- to moderate-income borrowers to buy the most affordable type of housing in Hawaii. The impact is snowballing and currently affects hundreds of buildings and thousands of dwelling units.

Our colleagues in the insurance industry have advised us that their ability to obtain re-insurance for hurricane losses at pre-existing prices, or altogether, and to continue to write policies with coverage for the full replacement cost has been impaired by the international re-insurance market, as many of these re-insurers have experienced recent significant hurricane claim losses with climate change. Making matters worse, the risk profile of Hawaii has changed altogether due to the Maui wildfires this past August. Strong and very destructive hurricanes have not impacted Hawaii frequently in recent history, however climate change may increase the future likelihood of severe damage and losses. Therefore, historic losses for all perils are less predictive for these insurers when estimating future claim amounts. This in turn decreases their willingness to write new policies and/or renew at marginally profitable or unprofitable premium rates.

In 1993, the HHRF was established under HRS 431P to provide hurricane insurance when the private hurricane insurance market collapsed as a result of the 1992 Hurricane Iniki. It ceased operations in 2002 when the private hurricane market had been re-established. As originally structured, the HHRF was not authorized to issue hurricane insurance for condominiums in amounts sufficient to address the current underinsurance situation. Nor was it funded at levels sufficient to cover the amounts of cumulative coverage needed in today's environment. This Bill will amend the HHRF to include coverage of condominiums, while continuing to provide coverage for single-family and commercial properties.

This Bill also provisions various methods to build the fund to a level sufficient for the expected losses. As drafted, the burden of funding the HHRF will be allocated between sellers of real estate, (with a conveyance tax surcharge), buyers and/or lenders of real estate, (with a special mortgage recording fee), all property owners, (with an ongoing surcharge on policy premiums), and landlords/renters of transient vacation rentals (with an increase to the transient vacation rental tax). We understand that funding mechanisms sufficient to sustain the HHRF on an ongoing basis are necessary and we support this multi-faceted approach. However, **WE REQUEST THE FOLLOWING AMENDMENT on page 52:**

Leave the "special mortgage recording fee" percentage at one tenth of one per cent, as originally incorporated into HRS 431P, instead of increasing it to two-tenths of one per cent.

The average purchase mortgage loan amount in Hawaii in 2023 was \$653,709<sup>(1)</sup>, resulting in a fee of \$653.71 at one tenth of a percent and \$1,307.42 at two tenths of a percent. This fee will be borne by the home buyer and is an additional burden and obstacle to homeownership in Hawaii. Many potential homeowners are already struggling with the down payment and closing costs, and the additional \$653 will be yet another impediment to deter a first-time homebuyer from achieving homeownership, but doubling it makes matters even worse.

(1) Source: Title Guaranty monthly Residential Market Share report

As mortgage lenders, our hands are tied to severely curtailing or discontinuing lending on units in these underinsured condo projects altogether. Additionally, our ability to provide low-downpayment financing with mortgage insurance may be impaired by mortgage insurers' unwillingness to insure condo projects that do not meet Fannie Mae's or Freddie Mac's guidelines. Therefore, first-time homebuyers and low- to moderate-income borrowers, who need low-downpayment financing, are the most adversely impacted.

We request expedited passage of this Bill by the Legislature, the signing by the Governor of this Bill into law, and re-establishment of the HHRF's ability to issue policies as soon as operationally viable.

Thank you for the opportunity to present this testimony.

Victor Brock  
Mortgage Bankers Association of Hawaii
